## Projects In GCC

### 1. Grand Bleu Tower (Elie Saab– Emaar Group)

We are proud to have successfully completed our contribution to Grand Bleu Tower by Elie Saab, a landmark development by Emaar Group that redefines luxury waterfront living. This prestigious project reflects a seamless blend of world-class design and refined elegance, where every detail is thoughtfully curated. Our advanced home appliance solutions were carefully selected and integrated to complement the sophisticated interiors, ensuring both aesthetic harmony and high-performance functionality. Designed to meet the demands of premium residential living, our appliances deliver reliability, efficiency, and modern innovation—enhancing the overall lifestyle experience for residents in one of Dubai’s most iconic addresses.

## 2. Lusail Residential Tower in Qatar

Setting New Standards in the GCC, the Lusail Residential Tower in Qatar is now complete, marking a major milestone in our regional portfolio. This project demonstrates our commitment to excellence, innovation, and superior craftsmanship in luxury residential construction. From concept to completion, our team delivered every detail with precision, ensuring world-class quality and elegance. This achievement not only strengthens our presence in the GCC construction market but also highlights our ability to create exceptional living environments that inspire and endure.

## OVEN 90 CM TFO90GG/DELUXE

The TFO90GG/DELUXE is an extra-large gas oven that combines traditional cooking with modern air fry technology.

With 118L capacity and premium Italian-German components, it delivers precise, even, and flavorful results.

Designed for home chefs, it blends authentic gas performance with healthy, convenient frying and professional-grade style.

### Key Features

- Extra-large 118L capacity for multiple dishes at once
- Full gas oven and grill for authentic, traditional cooking
- FryArt air fryer for healthy, low-oil cooking

## MICROWAVE TBI8213

The TBI8213 25L microwave oven delivers powerful and versatile cooking with microwave, grill, and convection functions.

Equipped with 1000W microwave power, 10 auto menus, and touch control with press-door opening, it ensures precision and ease of use.

Designed with a white LED display and advanced safety features, it provides efficient, high-performance cooking for modern kitchens.

### Key Features

- 34L Capacity with Microwave, Grill & Convection
- 1000W Microwave / 1100W Grill / 2500W Convection Power
- Touch Control with Press Door Open

## Feature of the Month

How to maintain your gas oven clean and efficient to ensure durability and performance for years.

Keeping a gas oven clean and efficient over the years is mostly about consistent habits rather than deep cleaning once in a while.

**Here are few practical, easy-to-follow tips:**

### **Clean Spills Immediately (or ASAP)**

- Grease and food spills harden over time and affect heat distribution.
- Wipe spills once the oven cools down slightly
- Use warm water + mild dish soap (avoid harsh chemicals)

### **Do Regular Light Cleaning)**

- Instead of occasional heavy scrubbing:
- Clean the interior every 1–2 weeks (depending on use)
- Remove racks and wash them separately
- Wipe the oven door glass for better visibility

## Keep Burners & Gas Openings Clear

- Clogged burner holes can reduce efficiency and cause uneven heating.
- Check burner ports for grease or debris
- Use a soft brush or toothpick (gently) to clear blockages
- Never use sharp metal objects that can damage parts

## Avoid Harsh Chemical Cleaners

- Grease and food spills harden over time and affect heat distribution.
- Wipe spills once the oven cools down slightly
- Use warm water + mild dish soap (avoid harsh chemicals)

## Don't Block Airflow

- Proper air circulation ensures even cooking.
- Avoid overcrowding the oven
- Leave space around dishes for heat to move

## Schedule Annual Maintenance

- A technician can:
- Check gas lines and safety
- Clean internal components
- Ensure optimal efficiency
