Buhairat Villas Dammam

We are proud to announce the successful completion of the Buhairat Villas project in Dammam. This project reflects our commitment to delivering high-quality, reliable kitchen solutions with a perfect blend of functionality and modern design. From premium appliances to refined finishes, every detail was carefully executed to meet the highest standards.

King Faisal air academy housing

We proudly completed our project at the King Faisal Air Academy Housing, delivering premium kitchen appliances designed for modern living. This achievement reflects our commitment to quality, durability, and elegant performance.

THOMSON

friendly technology

Upgrade your kitchen with the perfect blend of innovation and elegance through the Tolomeo Hob and Copernico Hood—where premium performance meets refined design. The Tolomeo Hob delivers precise heat control, energy efficiency, and a sleek modern finish that enhances every cooking experience, from quick meals to gourmet creations. Paired with the Copernico Hood, engineered for powerful suction and whisper-quiet operation, your kitchen stays fresh, clean, and effortlessly stylish.

TOLOMEO

The Tolomeo Hob combines sleek design with powerful induction performance, offering precise control, flexible cooking zones, and energy-efficient operation—perfect for a modern, premium kitchen.

Feature of the Month

How to Keep Your Kitchen Hood Clean & Performing Like New

A well-maintained kitchen hood & hob doesn't just keep your space looking elegant—it ensures powerful performance, cleaner air, and long-lasting durability.

Consistent care makes all the difference.

Here are a few simple yet effective tips:

Keep air vents clear

- Ensure ventilation openings and ducts are not blocked to maintain strong suction performance.

Check and replace charcoal filters

- Replace or regenerate (if applicable) based on usage—especially in recirculation mode.

Clean Filters Regularly

- Wash grease filters at least once a week
- Prevents grease buildup and fire risk
- Keeps suction performance strong

THOMSON

friendly technology

Wipe Surface After Every Use

- Use a soft cloth + mild cleaner
- Avoid abrasive materials (prevents scratches)
- Keeps glass/ceramic finish looking premium

Check & Empty Water Collector

- Inspect every 2 weeks
- Empty collected liquid to avoid overflow
- Maintains efficient extraction

Replace or Maintain Carbon Filters

- Proper air circulation ensures even cooking.
- Replace/refresh after ~200 hours usage
- Essential for odor control in recirculation mode
- Reset filter indicator after replacement
- Leave space around dishes for heat to move

Keep Airflow & Ventilation Clear

- Ensure no blockages in extractor vents
- Maintain proper kitchen ventilation
- Improves performance and prevents overheating
